ABSTRACT

This report analyzes revenues from state governments and combined revenues from state government and state university sources for each state, as reported to the Corporation for Public Broadcasting by public broadcasting licenses in the Annual Financial Report survey, Fiscal Year 1997. All revenue amounts contained in this report include cash, indirect, and in-kind support. The total contributions from state governments and state colleges and universities accounted for nearly 24% of total public broadcasting revenue in Fiscal Year 1997; state contributions to public broadcasting stations varied greatly among states, ranging from zero to $39 million for public television and from zero to more than $2.4 million for public radio. Four tables show the state revenue analysis for public television grantees by state, Fiscal Year 1997; public radio grantees by state, Fiscal Year 1997; state government revenues for public television grantees by state in the United States, Fiscal Years 1992-1997; and state government revenues for public radio grantees by state Fiscal Years 1992-1997. No. 108, September 1998

PUBLIC BROADCASTING STATIONS' REVENUE FROM STATE GOVERNMENTS AND STATE COLLEGES AND UNIVERSITIES RANKED STATE-BY-STATE, FISCAL YEAR 1997

ED 423 875

This report analyzes revenues from state governments and combined revenues from state government and state university sources for each state, as reported to the Corporation for Public Broadcasting by public broadcasting licensees in the Annual Financial Report survey, Fiscal Year 1997. All revenue amounts contained in this report include cash, indirect, and in-kind support.

The total contributions from state governments and state colleges and universities accounted for nearly 24 percent of total public broadcasting revenue in Fiscal Year 1997.

In Fiscal Year 1997, state government contributions to public broadcasting stations varied greatly among states, ranging from zero to $39 million for public television and from zero to more than $2.4 million for public radio.

State Government Support for Television:

South Carolina ($39 million), which received substantial state capital improvement bonds proceeds and capital reserve fund appropriations, led all other states by a large margin in state government funding. Other top states, by funding level, were Georgia ($17.4 million), Kentucky ($16.5 million), Ohio ($15.8 million), and Utah ($15.5 million). Ranked by state government support per person, South Carolina ($10.55), Utah ($7.75), Nebraska ($5.24), Kentucky ($4.24), and Iowa ($3.25) made up the top five states. (See Table 1). Public television stations, particularly those licensed to state agencies, relied heavily on state revenue sources for support (over 53 percent of the total state licensees' revenue). In FY 1997, nearly 19 percent of total public television revenue came from state government sources.

State Government Support for Radio

The state of Alaska surpassed all other states in total state government support ($2.4 million). Other top funding states were Wisconsin ($2.2 million), Ohio ($2.0 million), Florida ($2.1 million), and New York ($1.4 million). (See Table 2). In per person state support, Alaska ($3.92) led all states by a large margin, followed by Wyoming ($0.83), West Virginia ($0.64), South Dakota ($0.62), and Mississippi ($0.48).

In general, public radio stations relied less on state revenue sources for support than public television stations did. In FY 1997, state government sources comprised 5.2 percent of the total public radio system revenue.

Tables 3 and 4 present each state's support to public television and radio stations in detail for the last six years.

* Direct comparisions between 1996/1997 and earlier years should be avoided because of major changes in the reporting standards in FY 1996.

**State support to the South Carolina network increased substantially due to the state capital improvement proceeds and capital reserve fund appropriations in FY 1997.
